# SMART WALLETS FOR SMART PEOPLE

## ÖGON : THE CREATOR OF ALUMINIUM WALLETS

Founded in 2004 in France, ÖGON DESIGNS invented the concept of the **smart wallet**, launching the very first designer wallet made of aluminium.

The arrival of ÖGON, revolutionized the leather goods market and our iconic model, the Stockholm rapidly became **a best-seller and international success.**

Since ÖGON DESIGNS has continued to produce **innovative wallets** with a unique take on the traditional wallet.

We offer wallets to meet everyone's needs with **quality and craftsmanship** that combine **style and functionality.**

---

### ERIC BERTHES

Since 2012, ÖGON's visual identity and new collections have been handed over to the **famous French designer** Eric Berthes.

The talented designer has already worked for some of the **most renowned brands** such as Bollinger, Sonia Rykiel, Corum, and Ruinart.

He created for ÖGON DESIGNS, the Quilted Collection, the **first wallets ever made with quilted aluminium.**

# RFID PROTECTION

IT'S BETTER TO BE SAFE...

Every ÖGON product, due to their aluminium cover, act like small Faraday cages. They stop magnetic waves and protect cards against demagnetization. Even better, all ÖGON models are certified « **RFID Safe** » because by blocking radio waves, they prevent any chance of unauthorized scanning of your cards or access to your personal information.

By developing this security system 15 years ago, ÖGON is a **true pioneer** in this technology.

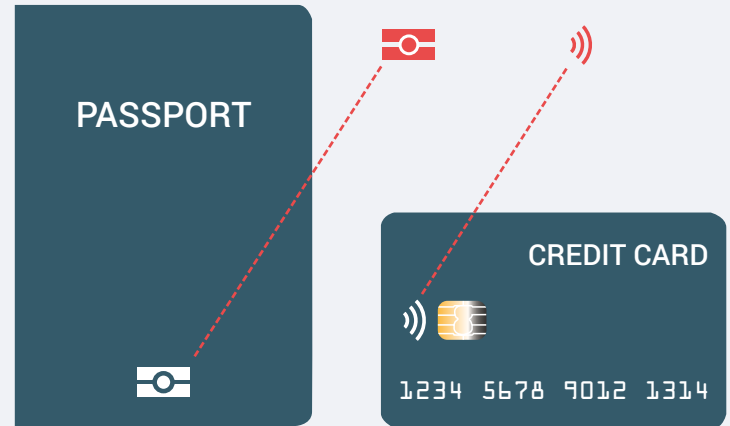

*All ÖGON models protect  
your credit cards from hackers.*

# WHAT IS RFID AND WHY YOU NEED TO BE PROTECTED ?

More and more credit cards and passports are outfitted with RFID (Radio Frequency IDentification) chips.

This technology is what makes cards capable of contactless payment.

On the downside, individuals who have RFID readers can extract sensitive information from credit cards or passports without the owner even knowing that they were victimized.

This phenomenon is known as **digital pick pocketing**.

If you own a card with a RFID chip that puts you at risk of fraud and identity theft, it is still possible to reduce the risk by using a **RFID protected wallet**.

# STOCKHOLM

*Our iconic model, the Stockholm, was the first designer wallet made of aluminium, opening new horizons in the leather goods market.*

*Compact and light, it's fan shape opening allows easy and fast access to each card and banknote as well as an optimal organization of its content.*

- Holds up to **10 cards and banknotes**
- **Dimensions:** 110 x 74 x 21 mm - 70g

**The +** *One-handed opening, the content is visible in an instant, compact, light.*

The Carbon Passport Clip protects your biometric passport from identity theft.

- It fits your **passport, plane ticket, ...**
- **Dimensions:** 129 x 91 x 8 mm - 30g

**The +** *Perfect for travelling ! It can hold your passport, boarding pass, cards...*

# COLLECTION CARBON

## A SPECIAL HANDMADE PROCESS

Our carbon fiber wallets are produced in collaboration with a **highly experienced carbon fiber partner factory** based in the center of France.

We use the **highest aerospace and motorsport grade quality carbon fiber** and each wallet is built and treated using **special handmade processes** to achieve a **superior finishing**.

Carbon fiber is made of thin, strong crystalline filaments of carbon that is used to strengthen material. Carbon fiber can be thinner than a strand of human hair and gets its strength when twisted together like yarn. Then it can be woven together to form cloth and if needed to take a permanent shape.

Carbon fiber's weight-to-strength ratio is astonishing, it is **stronger than steel**, and **lighter than aluminum**; making it very popular in many industries such as aerospace, automotive, military, and recreational applications.

## LUXURY SMART WALLETS

The products in the carbon fiber collection are made from **real carbon fiber material** for **durable** and **lightweight** characteristics while exhibiting **elegant** and **modern design**.

Thoughtfully designed to be practical, they are suitable for all occasions: business, holidays, sports and outings. **Shock proof**, these wallets will protect your cards from anything.

Like all our other models made of aluminium, the Carbon Collection is also guarded with **RFID blocking technology**, any valuable information will be kept safe and **protected from electronic pick pockets**.
